

## COMPANY PROFILE

The LITTLE HORSE Fire Division has installed thousands of Diesel Units throughout the world, confirming its world leader position in the field of automatic extinguishing by Sprinklers systems. This young company has 30 years of experience in fluid dynamics, overall design, development of its industrial potential, selection of the most reliable products with unequaled quality-price ratios. Our factories are located in FRANCE and GERMANY.

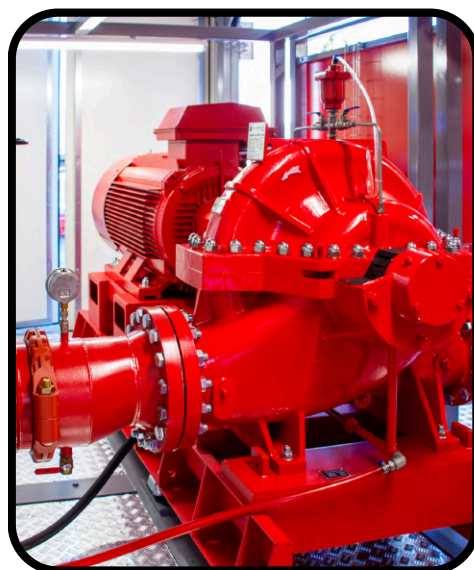

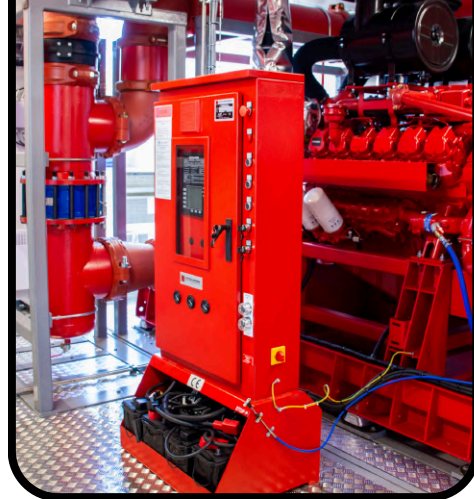

LITTLE HORSE's staff will be there when you need their help. Active cooperation with the customer, competent liaison staff, insurance companies, specialized engineers available at all time capable of assisting you in building your installations. These men control the Fire Protection environment and will help you to decide upon a consistent set of measures and options to be implemented at the best possible cost. LITTLE HORSE is a leader in the design of integrated electronic management systems - Interaction, communication and managing of a network of Diesel Engine Fire Pumps.

## DIESEL AND ELECTRIC FIRE PUMP UNITS

The Fire Pump Unit is manufactured with the greatest precision. A policy of resolute and coherent quality, permanent technical innovation, and an active collaboration with you, our customer and partner, embodies our desire to become always more familiar with your environment. Close and long-lasting relationships with our partners in the whole world are the result of this philosophy.

LITTLE HORSE proposes also fully equipped and customized Fire Pump houses, which are tested in house and ready to use integrating all necessary automation devices (embedded electronics, remote monitoring and reporting of information, automatic recording of all events, valve control, SIL--3 qualified...).

LITTLE HORSE cater to an International market and are present in all fields (Oil & Gas, Offshore Oil Rigs, Power Plants, Warehouses, Airports, Department stores etc.) and comply with International Fire Standards (NFPA 20, UL, FM, EN12.845, VdS etc.).
